

SQL Practice Questions

1. Find the total number of customers.

```
6  -- 1.  Find the total number of customers.
7  •  select count(distinct customerID) as Total_Customers
8     from telco_churn.telco_customer;
```

Result Grid | | Filter Rows: | Export: | Wrap Cell Content:

	Total_Customers
▶	7032

2. Count customers who churned.

```
10  -- 2.  Count customers who churned.
11  •  select count(*) as Churned_Customers
12     from telco_churn.telco_customer
13     where Churn = 'Yes';
14
```

Result Grid | | Filter Rows: | Export: | Wrap C

	Churned_Customers
▶	1869

3. Calculate the churn rate.

```
15  -- 3.  Calculate the churn rate.
16  •  select
17     COUNT(*) as Total_customers,
18     SUM(case when Churn = 'Yes' then 1 else 0 end) as Churned_customers,
19     ROUND(SUM(case when Churn = 'Yes' then 1 else 0 end) * 100.0 / COUNT(*), 2) as Churn_rate_percent
20  from telco_churn.telco_customer;
21
```

Result Grid | | Filter Rows: | Export: | Wrap Cell Content:

	Total_customers	Churned_customers	Churn_rate_percent
▶	7032	1869	26.58

4. Find the average monthly charges.

```

22  -- 4.  Find the average monthly charges.
23 • select round(avg(MonthlyCharges),2) AS Avg_monthly_charges
24 from telco_churn.telco_customer;
25

```

Result Grid	Filter Rows:	Export:	Wrap Cell Content:
	Avg_monthly_charges		
▶	64.8		

5. Find total revenue.

```

26  -- 5.  Find total revenue.
27 • select
28         round(sum(TotalCharges),2) AS Total_Revenue
29 from telco_churn.telco_customer;
30

```

Result Grid	Filter Rows:	Export:	Wrap Cell Content:
	Total_Revenue		
▶	16056168.7		

6. Find churn by contract type.

```

--
31  -- 6.  Find churn by contract type.
32 • select Contract,
33         count(*) as Churned_customers
34 from telco_churn.telco_customer
35 where Churn = 'Yes'
36 group by Contract;

```

Result Grid	Filter Rows:	Export:	Wrap
	Contract	Churned_customers	
▶	Month-to-month	1655	
	Two year	48	
	One year	166	

7. Find churn by internet service.

```

38 -- 7. Find churn by internet service.
39 • select InternetService,
40        count(*) as Churned_customers
41 from telco_churn.telco_customer
42 where Churn = 'Yes'
43 group by InternetService
44 order by Churned_customers desc;

```

Result Grid		Filter Rows:	Export:	Wrap Cell
	InternetService	Churned_customers		
▶	Fiber optic	1297		
	DSL	459		
	No	113		

8. Find churn by payment method.

```

46 -- 8. Find churn by payment method
47 • select PaymentMethod,
48        count(*) as Churned_customers
49 from telco_churn.telco_customer
50 where Churn = 'Yes'
51 group by PaymentMethod
52 order by Churned_customers desc;

```

Result Grid		Filter Rows:	Export:	Wrap Cell Content
	PaymentMethod	Churned_customers		
▶	Electronic check	1071		
	Mailed check	308		
	Bank transfer (automatic)	258		
	Credit card (automatic)	232		

9. Find the average tenure of churned customers.

```

54      -- 9.   Find the average tenure of churned customers.
55 •   select
56         avg(tenure) as Avg_tenure,
57         count(*) as Churned_Customers
58     from telco_churn.telco_customer
59     where Churn = 'Yes';

```

Result Grid	Filter Rows:	Export:	Wrap Cell Content:
Avg_tenure	Churned_Customers		
17.9791	1869		

10. List the top 10 customers with the highest total charges.

```

56      -- 10.  List the top 10 customers with the highest total charges.
57 •   select
58         customerID,
59         sum(TotalCharges) as Total_revenue
60     from telco_churn.telco_customer
61     group by customerID
62     order by Total_revenue desc
63     limit 10;

```

Result Grid	Filter Rows:	Export:	Wrap Cell Content:	Fetch rows:
customerID	Total_revenue
